From the Sports Desk with John English

Brewer Falls to Frisco; Lady Bears Find a Win at Godley **Tournament; Four Cross Country Runners Finish in Top 20**

The Brewer football team came up short in their season opener last Friday night, losing to Frisco by a score of 36-7.

Coach Jason Wheeler said that the Bears had a couple of issues early on.

"We started slow on offense," Wheeler said. "They got the ball deep in our territory and were able to take advantage of that early and kind of put us behind the 8-ball."

Wheeler said he does not attribute the loss to first game jitters.

"I think it's just a matter of needing to get more experienced across the board," Wheeler said. "When I looked out there, I think I only saw four guys on the offensive side of the ball that came back from last year. So we're just young and need to get more experience."

Wheeler said the was pleased with the defensive effort, saying that the Bears defense kept the team in the game for two and half quarters and gave them a chance to win.

Tyrelle Davis scored Brewer's only touchdown of the night early in the fourth quarter.

Brewer will take on Frisco Wakeland at 7 p.m. tomorrow night at Bear Stadium, and Wheeler said (continued on page 3)

Hello Fellow District 99 Residents,

My name is Mimi Coffey and I am running to be your State Representative. I have spent most of my entire life in District 99. I have raised my 4 children here. As a defense attorney of 27 years, I am used to fighting uphill battles and negotiating. I will fight hard for the needs of our northwest Tarrant County resi-

Our property taxes are too high. Women's reproductive rights have been taken away. Our public schools are in a crisis with a shortage of teachers. It is getting harder for the majority of northwest Texans to make ends meet with rising costs. As a small business owner of 22 years, I know what it takes to run a successful business and take care of your people. The pandemic has taught us that to survive we must embrace change. I am ready to serve both Democrats and Republicans alike. District 99 is military and defense industry heavy. I understand and respect this as my father served in the Army and retired from Lockheed-Martin (General Dynamics). I have the utmost respect for our incumbent representative and if elected, plan to continue his tradition of excellent service to the community.

I invite you to visit my website, mimicoffeyfordistrict99.com for more information. I'm asking for your vote so that we can put PEO-PLE OVER POLITICS. Feel free to text or call me direct at 817-205-4861.

Brewer Sports (continued from page 1)

he has a pretty good idea about the Wolverine's game plan.

"They've got a big tight end (Tripp Riordan), who is a big play guy," Wheeler said. "He's really going to be the focus of their offense."

On the court, the Brewer volleyball team finished 3-3 in the Godley Tournament this past weekend and coach Jill Barkey said that, overall, her team played well.

"I felt there was one loss that should have been a win, but it just wasn't our match," Barkey said. "We played a great last match against a great Pascal team. We did a lot of really wonderful things and fought hard."

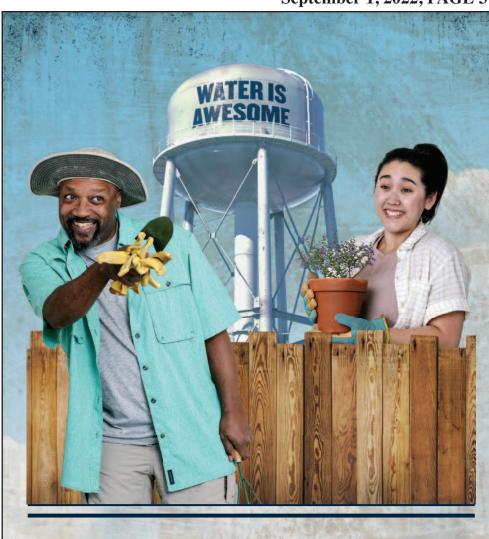

Brewer will play at Glen Rose at 4:30 p.m. tomorrow afternoon, and Barkey said, "That's always been a solid program," Barkey said. "I'm excited to see after this weekend of some pretty great play how we'll match up."

At the Gingerbread Jamboree in Denton this past week, the Brewer cross country teams had a total of four runners finish in the top 20 among the large schools competing.

On the girls' side, Kaylin Rendon finished sixth overall with a time of 21.04.42, Aolania Woldai was 10th with a time of 21:37.41 and Jade Reyes finished 17th with a time of 22:09.32. On the boys' side, Augustus Weir finished 20th with a time of 18:36.90.

The cross country teams will compete in the Fossil Ridge Run of the Panther tomorrow.

WATER Oleighborly

Texans are proud of a lot of things, including our native plants. They're beautiful, hardy and don't need much water. Share a few of your favorites with your neighbor. Things will look a little more colorful and everyone will save some water. Native plants (and sharing them with your neighbors) can help keep the towers full.

WATERISAWESOME.COM

Education in America - the Last 400 Years by Dr. Ken Bridges

School is starting once again across the nation. Millions of students are returning to classes. It is part of a time-honored ritual, sometimes loved and sometimes loathed, all in an effort to help make better, wiser citizens and to show students the heights they are capable of reaching. Public schools have been a part of American life for nearly four centuries.

Many ancient societies had systems of learning, and children have been learning from parents from times long since past. The earliest public schools date to Massachusetts in 1635, the first being the Boston Latin Grammar School. The Puritan settlers believed in education and made it a priority for children to be able to read and write well so they could read the Bible themselves and be able to represent their communities well in town meetings when a community's spending and priorities for the year would be set by the townspeople. The most important principle of these schools was that not only was every child welcome to attend, they had a responsibility to attend.

In 1636, the first college was founded in the United States. Harvard College was originally set up as a seminary to train future preachers and eventually expanded to become one of the world's most respected institutions for learning in regard to science, medicine, law, business, and even still today, theology. By the time the American Revolution began in 1775, there were eight colleges operating in the colonies, including what would become Columbia, Yale, and Princeton universities.

After the revolution, many northeastern states were attempting to establish a system of free public schools. Under the Northwest Ordinance of 1787, Congress set aside some proceeds of land sales to give communities in what became the Great Lakes states the means to establish public schools in their own areas. For the Founding Fathers, establishing a lasting republic meant education was a must. Well-educated citizens meant not only better merchants and builders, it also meant good government. Thomas Jefferson, the author of the Declaration of Independence, made education a priority in his years as governor of Virginia. However, his efforts to bring education to the people were thwarted by the upper-class planters who would not think of having their children mingling with the poor. Nevertheless, schools spread across the North, and the children of farmers attending school beside the children of wealthy bankers was increasingly a common experience.

Plans for free public schools in Texas began as early as 1829, with the first established in Nacogdoches in 1830. Many wealthier Texas settlers sent their children to boarding schools in the United States, but several private schools had emerged by the mid-1830s. In 1839 and 1840, the Republic of Texas passed a series of laws granting lands to the counties for funds to establish public schools, but the effort faltered. Among these laws was the 1839 act calling for setting aside lands to create a national university for Texas, which later became the University of Texas. However,

School is starting once again across the nation. Millions of schools would only begin to flourish in the state after the Civil dents are returning to classes. It is part of a time-honored rit- War

In 1862, in the midst of the Civil War, Congress began looking ahead to a time after the war and wanted to give the states the means to set up their own colleges, particularly ones dedicated to agriculture, engineering, and the sciences. The Morrill Land Grant Act provided these funds through proceeds of federal land sales. This legislation ultimately led to the creation of 69 state college systems across the country.

In 1860, there were only 100 free public high schools in the United States. By 1900, there were more than 6,000. This number had doubled by 1914. Many southern states did not have a statewide system of public education before the Civil War and would only establish these schools by the 1870s. By the early 1900s, school standards varied widely. The quality of education in many areas was very poor, with some schools not having the resources to teach some fields as science. And many teachers were unqualified. Reformers worked to establish teaching colleges in many states and push for compulsory attendance laws across the nation, including Arkansas, to create educators who understood what to teach and how to teach it well. In 1890, only 27 states and territories had compulsory school attendance laws, a number that had increased to 43 by 1914. The efforts would pay off. By 1940, nearly 50 percent of Americans had a high school diploma, a five-fold increase in just 30 years. In just a few decades, the United States had built the best education system in the world.

The University of Texas did not open until 1883. For the first few years of this college, there was no tuition charged to students. The state also opened what became Texas A&M University by 1871, primarily as an agricultural and engineering school. State leaders believed that by developing a population of engineers, doctors, lawyers, and other professionals, they were laying the groundwork for the future success of the state.

In 1900, there were just under 1,000 colleges operating in the United States, with 160,000 students. These were a mix of public colleges, private colleges, and church schools. Today, there are more than 19 million students, from dual-credit high school students to citizens well into their 80s attending the more than 3,000 colleges across the nation. At the lower grade levels, more than 3.2 million teachers are at work teaching students reading, math, art, writing, music, science, and especially that there are no limits to their dreams for the future.

From the Project Linus Blanketeers

First Monday Quilt Club -Project Linus Volunteers Needed

The 1st Monday Quilt Club will meet at Bethany Christian Church located at 1500 Meadow Park Drive in White Settlement from 10 a.m. to 1 p.m. on Monday, Sept. 5. Ladies may bring snack foods to share with others if desired.

Project Linus is a non-profit service organization. The members of this group are Tarrant County Chapter Project Linus volunteers who create handmade quilts and blankets that provide love, warmth, and comfort for local children who have suffered trauma, tragedy, or illness.

Volunteers also make coverlets for veterans, nursing home residents, and the homeless. Unfortunately, the need for these blankets increases each month. They desperately need volunteers with portable sewing machines to help assemble the quilts.

No experience is needed - there is a place for you. Anyone can help if you can follow instructions, sew, tie a knot, crochet a blanket, or tell a good joke. Volunteers have lots of fun and develop fantastic friendships. High school students can receive community service credits for participating. Materials (fabric, batting, thread, and yarn) are provided. Donations of fabric, yarn, thread, sewing machines, sergers, or money to purchase materials are greatly appreciated. Come join the fun and enjoy fellowship with the Quilt Club volunteers while you make a difference in our community by being a blessing to others.

For more information about the mission of Project Linus, visit www.projectlinus.org. For more information on this group and meetings, call Virginia Biela at 817-244-1263.

From the North Central Texas Council of Governments

Transit Providers to Survey Riders to Gauge Demand, Meet Needs

The first phase of a regionwide transit survey will begin in September, as Denton County Transportation Authority (DCTA), Trinity Metro and Arlington Via passengers are asked to help planners determine the demand on the system and potential future improvements.

Funded through a partnership between the North Central Texas Council of Governments (NCTCOG), Dallas Area Rapid Transit (DART), DCTA and Trinity Metro, the survey will be conducted in two phases. The first will start in early September and continue through November. The second phase, to be conducted from January through May 2023, will focus on DART and the Trinity Railway Express.

During both phases, two types of transit travel surveys will be conducted to determine how traditional, fixed route and on-demand (microtransit) riders are using the expanding public transportation network and what changes could be made to better accommodate the needs of the growing region.

The first survey is an on-to-off survey, which will attempt to measure demand and passengers' trip patterns on each transportation mode. Upon boarding a bus, riders will be handed cards by surveyors wearing blue vests and asked to return the cards when they disembark. On the region's various rail lines, passengers will simply be asked at what station they will get off.

The second type of survey, a questionnaire, will involve surveyors asking randomly selected passengers about their current trip and their socioeconomic characteristics. Some passengers will be asked to fill out paper questionnaires instead of participating in interviews. For microtransit routes, riders will be asked to participate in the survey after they complete their trips.

Both formats will contain the same questions. Participation in the surveys is voluntary, and answers will be kept confidential. The goal is to collect data from a random sample of 10 percent of transit riders

"NCTCOG coordinates regional transit data collection with DART, DCTA and Trinity Metro every five to seven years," said Arash Mirzaei, NCTCOG senior program manager, model and data development. "This is the first regional travel survey being held after the height of the COVID-19 pandemic. This transit survey provides a comprehensive picture of socioeconomic characteristics of transit users along with the trip details that help determine how and why they use the transit system. Transit agencies can use this data to adjust existing service and develop future plans."

Dallas-Fort Worth is the fourth-largest region in the nation, with a population of approximately 8 million. As North Texas attracts thousands of new residents each year, transit will play a significant role in ensuring the transportation system remains reliable and continues to improve into the future.

For more information about the survey, email transitsurvey@nctcog.org or visit https://nctcog.org/transitsurvey.

Dove Hunters Requested to Keep an Eye Out for Abandoned or Deteriorated Water Wells

Texas hunters headed out for dove season are asked to watch for abandoned or deteriorated water wells, and to report any they find to the Texas Department of Licensing and Regulation.

With as many as 150,000 abandoned or deteriorated water wells in Texas, chances are that hunters could spot these potential safety hazards that also contribute to groundwater pollution. Abandoned or deteriorated water wells can contaminate groundwater by providing a direct conduit for chemicals and other surface contaminants, such as animal waste and pesticides, to directly enter aquifers. Uncapped wells also present a physical danger to humans and animals who can be severely injured or killed when they fall partially or completely into the well.

What does an abandoned or deteriorated water well look like? There could be a plastic, steel, brick or concrete casing (pipe) that extends above ground, or there could be a hole in the ground with no apparent bottom. Some abandoned wells have concrete or brick casing extending above ground or a windmill with missing blades. Abandoned or deteriorated well casings or pipes may be cut off at ground level, posing an additional threat.

- Wells are "abandoned" when they are not in use, as defined by Texas Occupations Code, Section 1901.255.
- A "deteriorated" well is a well that is causing or likely to cause pollution of any water in the state, including groundwater. If you're aware of abandoned or deteriorated wells, please report them to TDLR: https://www.tdlr.texas.gov/abwells/default.aspx. When filing the report, please include an address or GPS Coordinates and any photos or video of the well, if possible.

To avoid problems related to a water well that's no longer in use, landowners should install a locking well cap or sanitary well seal – not just a cover over the well – to prevent unauthorized use or entry into the well. Septic systems should be pumped and inspected as often as recommended by the local health department. Care should be taken when mowing or working near the well.

Landowners are responsible for abandoned or deteriorated water wells on their property, and once they're aware of an abandoned well on their property, they must plug it within 180 days. Landowners can plug the well themselves (in compliance with Title 16, Texas Administrative Code, Section (76.104 Capping and Plugging Wells Standards) or hire a well driller or pump installer licensed by TDLR to plug the well or bring the well into compliance. If a landowner chooses to plug the well themselves, they are required to plug the well in accordance with TDLR's well plugging specifications https://www.tdlr.texas.gov/wwd/wwd-specs.htm and submit a State of Texas Plugging Report to TDLR within 30 days from the date the well was plugged.

Resources:

- Helpful guide to plugging wells click here
- Check whether a water well driller or pump installer is licensed: https://www.tdlr.texas.gov/LicenseSearch/.
- Water Well Drillers Law, Plugging Water Well: Texas Occupations Code, Section 1901.255.
- Water Well Drillers and Pump Installers Administrative Rules, Technical Requirements—Standards for Capping and Plugging of Wells and Plugging Wells that Penetrate Injurious Water Zones: Title 16, Texas Administrative Code, Section 76.104.

About TDLR

TDLR provides regulatory oversight for a broad range of occupations, businesses, facilities, and equipment in Texas. The agency protects the health and safety of Texans by ensuring they are served by qualified, licensed professionals. Inspections of individuals, businesses, and equipment are done on a regular basis to safeguard the public. Currently, the agency regulates 37 business and occupational licensing programs with almost 1,000,000 licensees across the state.

Visit TDLR's website for more information and resources. You can search the TDLR licensee database, and also find past violations in which a final order was issued against companies or individuals. TDLR's Customer Service line is available anytime between 7 a.m. until 6 p.m., Monday through Friday, at 1-800-803-9202. TDLR representatives are fluent in English, Spanish and Vietnamese.
